01 / CORPORATE FOUNDATION

About Us

Company background, vision, mission and leadership

World Green Engineering & Contracting Co. for Contracting possesses skilled work force with highly experienced engineering and management staff giving our Company inherited strength to offer complete EPC projects including Testing & Commissioning services for the Petrochemical, Refineries and Power plants. World Green Engineering & Contracting Company is capable of mobilizing its' highly skilled and experienced workforces with all the valid documents to any where in the Kingdom at any time. We can also arrange immediately any number of specialist Engineers and Technicians as per our clients interest as we have our own affiliate offices at international level.

World Green Engineering & Contracting Company's prime objective is basic & detailed engineering for his all projects to the highest standards and the entire satisfaction of the client. This objective is achieved through our continuous upgrading of resources, expertise, technological improvements, broadening of capabilities and enhancing performance and productivity with Safety.

Vision

To become the world's most reputed, Advance, and most Valuable Organization, by Continuously innovate our products and services to ensure our client's optimum business profitability.

Mission

The mission of World Green Engineering & Contracting is dedication to the highest quality of customer needs & service delivered with a High Business Ethics, Standard & Practices. In compliance with warmth, friendliness, individual pride, and company spirit.

Our Team

World Green was established to support technical and industrial operations in civil, mechanical, electrical and instrumentation services. The company profile published in 2021 describes a team serving petrochemical, oil and gas, refinery, fertilizer and steel-industry projects.

01 / LEADERSHIP

Director's Statement

Taking our company further

"Where change comes to work"

As a leader in the construction, renovation, reconstruction, and installation industry, and building facilities, our team is committed to maximizing client satisfaction through innovative and value-added project delivery. We take pride in selecting the right teams to meet the demanding and ever-changing needs of our clients. Our leadership is directly attributable to our talented staff's dedicated attention to our clients' needs and executing effective solutions to achieve success. Thus our motto: "Where change comes to work."

I am continually impressed by the resourcefulness and entrepreneurial quality displayed by our people and the exceptional value they bring to the company. This allows us to deliver added product value and outstanding customer service to clients who can count on us to carry out our promises. Our staff and executive team at W.G.E&C regularly assess and review our clients' needs, the programs we offer, and the effectiveness of the services we provide.

Shahbaz Ahmed | CEO

03 / TECHNICAL CAPABILITY

Engineering Capabilities

Civil works, mechanical construction and project delivery

Achievements & Capabilities

"World Green engineering & Contracting has rapidly developed its capability to become a leading operation, industrial Equipment & transport services Provider in the field of Mechanical, Electrical, & CIvil to the petrochemical, oil & gas/refineries, fertilizer plants and steel industries. Based on its excellent safety and performance, highest level of quality standards and proven ability to deliver in time. W.G.E&C has been the long term ‘’Partner of Choice’’ of majority of its client at present W.G.E&C employs over 400 qualified personnel deployed on various long-term base load maintenance contracts with SABIC ,Aramco & its affiliates and other private companies under W.G.E&C and its Partner’s..“

“insuring his valuale clinet with his dedicated team for best, quality of servies in its offerd services , with ,safety and expertise”

Project Management Engineering

Civil construction, foundations, earthworks and site development

World Green Engineering & Contracting and with its associates is a fully integrated engineering group with a prime

objective of providing basic & detailed engineering for the EPC projects to the highest standards. This objective is

achieved through the continuous upgrading of resources, expertise, technological improvements, broadening of

capabilities and enhancing performance and productivity. At the beginning World Green Engineering & Contracting

Company was established to design electro-mechanical & civil works to serve its customers. The company

capabilities were continuously expanded to undertake special system engineering projects all over the Kingdom,

which included the followings:

A. Civil Davison

The company capabilities with experienced team which can do the followings scope of works with quality & Safety:

- Pipe Sleepers Foundations

Pile Caps

High-resolution images from the latest World Green construction gallery.

Civil Works | Scope of Works

- Pipe sleeper foundations
- Pile caps
- Raft foundations
- Waterproofing works
- Concrete encasements and culverts
- Shoring and dewatering systems
- Pile load tests (compression, lateral and tension)
- Fence installation
- Excavation and backfilling
- Tank foundations
- Construction roads and parking

Mechanical & Industrial Works

Fabrication, installations and maintenance

B. Mechanical Davison

- Pipe Fabrication ,
- Pipe & Steel Structure Erection,
- Pipe & Structure Sand Blasting & Painting
- Rotary & Static Equipment Installation
- POWER PLANT, REFINERIES, PETROCAMICAL Plant Maintenance Works
- WATER SYSTEMS & ENVIRONMENTAL CONTROL
- Pipe Line Projects.
- Hunger & Shades Fabrication & Construction

Procurement Organization & Capabilities

World Green Engineering & Contracting is in coordination with affiliated companies has a vast local and international procurement network to encompass the entire range of requirements for the construction of various high-tech and fast track projects. Our Procurement Department makes use of established and standard operating procedures that govern effective procurement management thus putting World Green Engineering & Contracting Company in a unique position to obtain the most competitive prices and best delivery. The objective is to satisfy World Green Engineering & Contracting Company clients and deliver high quality material. This expertise and experience enables World Green Engineering & Contracting Company to provide alternatives to meet special projects requirements. The major activities covered by the Procurement Department are as follows:

Market Survey Foreign and local purchasing Expediting coordination and follow-up Commercial activities Material handling storage.

Procurement & Project Controls

Procurement, materials control, planning and contract administration

The material remains under the control of Stores Department until it is withdrawn from site stores for construction through authorized person.

Monthly stock reports are issued by the Stores department and the stock level is maintained with continuous feed back from construction department.

Project Contrils

Planning & Scheduling

A project comprise of a series of phases and activities. A method to harness the entire effort, throughout various stages of project is called planning. Planning defines the activities involved in the project, establishes logical sequence and inter-relationship between activities. Scheduling is to place the project activities on a working timetable. Importance of Planning:

Planning is essential to perform a function with minimum wastage of time and effort.

Schedule is a phased plan used as guide to monitor performance and control pace of activities to ensure completion of project at required time. Proper planning and scheduling is basis for evaluation of progress and performance. It helps in effective utilization of resources.

The following activities are performed regularly, for all active projects.

- o Site Visit
- o Project Schedule Update

Contract Administration

Contract Administration is to secure legal and contractual rights for the company in an efficient and timely manner. This function is to be carried out jointly by the Project Manager and Contract Administration Section.

- Contract Administration Section Responsibilities:
- Review of Contract Documents
- Custody of Original Contracts & Bonds
- Invoicing to Clients
- Payments to Subcontractor
- Record for Bonds, Guarantees & Insurance
- Contractual Correspondence

Quality Management System

Quality assurance, project plans and verification

Quality Uality Management System

INTRODUCTION It is World Green Engineering & Contracting Company policy to deliver products and services to the client in accordance with contract requirements. In order to serve this purpose effectively, World Green Engineering & Contracting Company has developed a Quality Management System covering all aspects of construction in accordance with quality standard.

Quality Management System

The Quality Management System consists of the following documents: A. Quality Policy Manual B. Quality Assurance Procedures C. Departments Quality Plans

Quality Contrils

- In addition to Quality Management System, World Green Engineering & Contracting Company develops quality
- plans specific for each project, implementation of project quality plans is the responsibility of project team. Periodic

- auditing is carried out to ensure implementation of project quality plan.
- The Project Quality Plans are established in accordance with the following:
- Project Organization Structure
- Procurement activities
- Construction activities

Special Processes

Procedures for special processes shall meet the requirements of applicable industrial standards. Qualification of welding procedures and welders are carried out by Independent Testing Agency. Non-destructive examination is carried out by approved Independent Testing Agency and in accordance with applicable industry standard.

QA/QC PERSONNEL The main function of QA/QC personnel is to monitor construction activities, and to perform inspection and testing, to ensure that products and services meet specified requirements. QA/QC personnel will take adequate measures to ensure implementation of Project Quality Plan.

AUDITING Internal auditing of the Quality Management System is performed on regular basis, for the purpose of continuous improvement. Project Quality Plan is the basic reference document for internal auditing of specific project.

- METHOD OF QUALITY CONTROL
- Implementation of specific Project Quality Plant.
- Implementation of specific Project Inspection & Test Plan.
- Supervisory Personnel and the craftsmen to be qualified and experienced.
- Skilled labor & tradesmen shall be deployed.
- Maintain documentation program that records the quality of all work performed.
- Monitor the testing performed by the approved independent testing agency.
- Issue Non-Conformance Report (NCR) or Corrective Action Request (CAR) for
- violation of project specification & applicable standards.
- Perform periodic audit at construction site.
- Perform periodic audit at construction site.
- Perform periodic management review to determine the effectiveness of the project quality system.

Engineering inspection and project controls - current website imagery.

04 / QUALITY ASSURANCE

Quality Management

Quality plans, inspections, controls and auditing

A typical QA/QC plan will consist of following outlines:

- 1.0 General
- 1.1 Purpose
- 1.2 Scope
- 1.3 Quality Objective
- 1.4 Definitions
- 2.0 Management Responsibility
- 2.1 Quality Policy
- 2.2 Organization
- 2.3 Quality System
- 3.0 Reference Documents
- 4.0 Responsibility and Authority
- 5.0 Project Procedures
- 5.1 Contract Review
- 5.2 Document Control
- 5.3 Internal Audit
- 5.4 Training
- 5.5 Quality Records
- 5.6 Design Control
- 5.7 Purchasing
- 5.8 Product Identification and Trace-ability
- 5.9 Handling Packaging and Delivery
- 5.10 Inspection and Testing (Construction)
- 5.11 Inspection, Measuring and Test Equipment
- 5.12 Control of Non-conforming Product
- 5.13 Corrective Action

- 5.14 Special Processes
- 5.15 Control of Subcontractors
- 5.16 Quality Assurance/Quality Control Reporting
- 5.17 Special Inspection Requirements for Critical Equipment & Activities.
- 5.18 Preparation of Quality Procedures

04 / HSE MANAGEMENT

Safety Management & Procedures

Worksite planning, orientation, reporting and prevention

PRE-CONSTRUCTION PLANNING: Prior to construction, the Project Safety Coordinator, in conjunction with the Site Manager, shall complete the following work:

- Develop final safety orientation program complete with handouts, films, etc., which may be required.
- Develop requirements for training.
- Establish interface with health officials.
- Determine location of emergency medical services and establish contacts.
- Establish contacts with doctors, paramedic service and emergency evacuation service and make necessary
- requisitions for commercial service.
- Site Safety Requisition for: * Safety personnel * First-aid trailers *First-aid equipment * Emergency
- vehicles.
- Determine availability of fire-fighting services.
- Establish plans for hazardous material training for employees (if applicable).
- Develop and initiate Safety Incentive Program.
- Update reporting forms if required.
- Ensure all documents is in place for pre-construction safety review.
- PRE-CONSTRUCTION SAFETY REVIEW
- Prior to construction, a joint meeting will be held to review the safety
- documents pertaining to that Area.
- As a minimum, the following personnel should attend:
- Site Safety Representative

- Site Managers
- The objectives of the meeting will be:
- Review the existing Construction Safety Execution Manual to ensure that the objectives of World Green
- Engineering & Contracting Company Health and Safety Program are being met.
- Ensure that the Construction Safety Execution Manual meets the
- Requirements of regulatory authorities.
- Review the responsibilities of the various entities who will be on site including:
- Client ii) Subcontractors iii) Consultant (if any) iv) Other contractor (if Any) Review whether significant
- site
- hazards have been properly identified and necessary procedures are in place to properly deal with
- these hazards,
- such as:
- Protection of workers against hazards
- construction.

PRE-CONSTRUCTION SAFETY MEETINGS (WITH SUB-CONTRACTORS) Site Manager Field Safety Supervisor Subcontractor Safety Representative Subcontractor Site Supervisor Subcontractor Management Personnel A meeting agenda will be provided to all attendees well in advance of the meeting and the meeting will be minute. A typical list of some agenda items to be considered is as follows: 1. Introduction of personnel and responsibilities. Designation of chairman and recording secretary Identification of attendees, company affiliations 2. Scope of work and layout: Outline of job (purpose, layout, duration, manpower, etc.)Outline related work/other

- subcontractors Locate restricted work area
- Review environmental and area resident’s concerns for the project.
- 3. Safety:
- Review safety objectives for the project
- Review subcontractors safety requirements
- Review project safety policy
- Review employee safety responsibilities/rules for construction site.

4. Review pertinent government regulations and establish contact responsibilities.

i. Identify safety representative of contractor, subcontractor and client.

Identify World Green Engineering & Contracting Company emergency response coordinator.

Establish procedures for the creation of appropriate work site safety committees.

Discuss:

Safety meeting schedule, format records and attendance Orientation of new employees Requirement for incident/accident reporting

Monthly safety records report to be generated

Review safe work procedures, stressing that they will be enforced on site.

Identify “hot and cold” work permit areas, emphasizing confined space entry and evacuation.

Identify smoking areas and rules.

Schedule initial equipment checkout and all safety and equipment inspections.

Review established project speed limits.

Stress that good housekeeping is a high priority and shall be enforced.

Schedule emergency drill.

Review First-Aid/Health issues.

Establish accepted ways and means of disposal of waste material, effluent, spills,

Review transportation of dangerous goods requirements.

Establish communications requirements.

Review of contractual implications of sub-contractors non-conformance to the construction Safety

Worker orientation for all World Green Engineering & Contracting Company and subcontractors personnel who will be working on the construction portion of a project shall be handled by World Green Engineering & Contracting Co. under the direction of Field Safety Supervisor.

Orientation is a pre-requisite to working at any construction site with the exception of those persons granted Visitor Status as outlined in “Security Requirement” of the Construction Safety Manual.

Workers who have attended the site safety orientation Session shall be given an identification card

which should be retained on persons to be shown on demand while within any of the construction areas, or on transportation to and from the job site. Safety orientation shall include the following information:

- Brief review of project scope and purpose
- Review of relationship of World Green Engineering & Contracting / Associated Partner's / Subcontractor
- Review of safe work procedures manual
- Training comprising minimum standard required by law
- Review of site security
- Review of basics of Emergency Response Plan and indication where information relevant to specific work
- sites may be obtained.
- All workers will be required to attend a general safety orientation session to be followed by the site specific
- safety orientation at individual sites. All workers who attend orientation sessions will be required to sign and
- attendance sheet.

Supervisor Orientation And Non-Working Status

All of the sub contractors' supervision staff on-site, at the level of foreman and above, shall be required to attend one or more orientation sessions conducted by World Green Engineering & Contracting Company in addition to the Project Safety Orientation previously described. The purpose of the sessions will be:

- To describe more fully the supervisors responsibility for the safety of his crew.
- To describe the supervisors accountability for the quality of the work performed by his crew.
- To describe the work planning process in which the subcontractor must submit a Weekly Work Plan prior to
- obtaining a Work Permit.
- To describe the Work Permit System
- To review the concept of workplace hazard identification where in the foreman continuously assesses the

- workplace for existing and potential safety hazards as part of his daily routine. Identification of hazards would
- be followed by automatic initiation of corrective action prior to the occurrence of accidents or incidents.
- All foreman shall remain at or near the work site at all times completely free to direct and advise his crew,
- monitor his crew's activities, and obtain permits for his crew's work on an hourly, daily and weekly basis.

Weekly: These meetings are similar to the daily meetings but additional time should be scheduled so that major topics of safety and discussions on resolution of previous safety items can be discussed. Weekly Craft labor toolbox meeting shall be minute and an attendance record will be signed by all present. World Green Engineering & Contracting Company safety representative shall be advised of all scheduled meetings, shall attend if possible, and shall receive copies of minutes and attendance record.

- WEEKLY SITE MEETINGS
- The meeting shall be attended by the supervisors and foremen representing all trades of the major
- site subcontractors and the supervisors and foremen of all minor subcontractors. Safety personnel
- shall also attend. Meetings will be chaired and minutes by World Green Engineering & Contracting
- Co. personnel. Prior to weekly site safety meeting, World Green Engineering & Contracting Co. may
- request the subcontractor's senior site representative to accompany World Green Engineering &
- Contracting Co. and the clients' senior site representatives on an executive walk around safety
- inspection. Purpose of the walk around is to identify hazard areas due to changing site conditions
- and to assess general safety practices being utilized. Typical discussions minutes should include:
- Date, time of commencement and adjustment.
- Location of construction site, name of subcontractor(s) and types of construction.
- Members of committee present. List names with spaces for occupation, name of employer and
- company crew size.

Pre-Construction Equipment Check

A safety representative of World Green Engineering & Contracting Company and the subcontractor shall audit all construction equipment for compliance with regulatory and project safety standards. Deficiencies shall be corrected prior to the use of the equipment on the project. Equipment which

appears to be in poor repair will require a mechanic's certification of worthiness. A record to the check shall be kept by World Green Engineering & Contracting Co. and a copy given to the subcontractor. A new check will be completed in its entirety when deficiencies have been corrected.

Safety Meetings

World Green Engineering & Contracting Co. is committed to achieving a high level of excellence pertaining to the health and safety of employees and believes this is only achievable through open and constant communication at all levels. To ensure this, World Green Engineering & Contracting Co. shall conduct the following meetings/sessions on all work sites:

- Subcontractors or trades not represented.
- Minutes of previous meeting.
- Report of dispensation of previous recommendations.
- Accidents or injuries investigated since previous meeting.
- Weekly job site meetings report.
- Any unsafe conditions, inspection, project safety audit report, or observation report are to be read
- into the minutes, including the date, report number and name of inspector.
- Problem
- Corrective action
- Responsibility
- Results of executive walk around safety inspection.
- Work schedule projections.

Management and supervisor meeting For each project area, biweekly review meetings shall be held to review incidents of equipment damage, personal injuries, construction errors, close call occurrences, thefts, fire exposure, attendance and productivity performance. Attendees will include:

A) Project Manager

B) Site Manager

B) Field Safety Supervisor

D) Representatives of Subcontractors

Required improvement or changes to safety precautions on the project may result from these meetings.

Implementation of these actions will be the responsibility of the Site Manager.

Accident Investigation And Reporting.

The principal purpose for reporting accidents is to ensure that any injured worker(s) receive the benefits to

which they are entitled and to ensure that information regarding the accident is received by the proper people who are able to assist in preventing similar occurrences elsewhere. Some guidelines in reporting are presented here to assure that a uniform method of reporting and recording accidents is utilized on the project by all persons.

Responsibilities

Field safety reports and records are the responsibility of the Site Manager. He may designate, as required, other staff to compile and complete the reports. Field reports and records must be completed immediately after each accident. Each reportable medical aid, lost time accident or property damage/loss will require the completion of Accident Investigation Report in addition to any reports completed by the Employer involved. Accidents involving cranes will additionally require completion of Crane Accident Investigation Report. Copies of all investigation reports will be sent to World Green Engineering & Contracting Co. Safety Representative within 24 hours of the occurrence, however World Green Engineering & Contracting Co. Representative will be notified verbally as soon as possible after the occurrence. The original of any Accident Investigation Report will be routed through World Green Engineering & Contracting Co. Safety Representative for signature prior to distribution. Monthly statistics reports relating to accidents will be in accordance with the company standard procedure.

REPORTING INITIAL OCCURRENCE (FIRST-AID): Any occurrence of injury or illness reported to first aid, supervision or to a medical treatment center shall be recorded in detail in the First-Aid Treatment Book. A first-Aid Treatment Book will be kept in the First-Aid. A trailer will be kept at each site for all employees working at each site. Entries in the logbook shall be by the nurse, or the designated First Aid Representative and all information shall be kept confidential. Subcontractors who do not work on the sites covered by Project First-Aid facilities shall make provisions for their own First-Aid treatment and records. First-Aid Treatment Books of all subcontractors are subject to audit by World Green Engineering & Contracting Co. safety personnel.

World Green Engineering & Contracting Co. INTERNAL REPOERTING World Green Engineering & Contracting Co. Safety Supervisor shall ensure that the following information are completed, on a

monthly basis, for each project and for the combined projects from the summaries provided, and checked against information obtained from accident/incident reports:

- Lost Time Frequency Rate
- Record of Man-hours and Accidents
- Gross man-hours worked on the project for all contractor personnel (including subcontractors).
- Brief description of all major safety achievements and recommendations.

Reporting Lost Time Accident

When an employee experiences an accident, the employee has the right to be examined by a doctor. Should the employee choose not to be so examined, the First-Aid Attendant may require such an examination in any event, it is felt to be necessary. In the event the doctor determines the employee should take time off work in addition to the day the accident occurred, the accident becomes a “Lost Time Accident”. A lost Time Accident is required to be reviewed with World Green Engineering & Contracting Co. senior management within 24 hours after the occurrence. All Lost Time Accidents shall be investigated and recorded on the Lost Time Accident Report and shall be submitted to the World Green Engineering & Contracting Co. Safety Representative on a monthly basis whether or not lost time accidents occurred during the month.

Any infraction and/or potential unsafe conditions shall be recorded at the time they are observed and corrective action must be initiated immediately. If immediate corrective action is not possible, the hazard(s) shall be identified with markers as “unsafe” until proper corrective action can be taken. The completed inspection form with the appropriate comments and actions required shall be filed with the Site Manager upon completion of the inspection with a copy to the subcontractor. The Field Safety Inspector shall follow-up on his inspection report to ascertain that areas marked “unsafe” are being corrected as soon as possible.

The Site Manager shall formally advise subcontractor in writing of any unsafe condition on which action has not been taken by the time of the next weekly inspection, requesting corrective action. Lack of response to this written advisory request will be cause for contractual action against the subcontractor.

Subcontractor Reporting

Each Subcontractor shall submit to World Green Engineering & Contracting Co. no later than the 2nd working day of the following month a Sub contractor’s Monthly Safety Report detailing lost time accidents, medical aid, near misses, lost work days, man-hours worked; and automotive incidents on the form provided.

World Green Engineering & Contracting Co. FIRST – AID REPORTS.

World Green Engineering & Contracting Co. First Aid Representative shall summarize the first aid visits on a monthly basis for each of the sites where a first-aid trailer (and record book) is located. Additionally, minutes of all safety meetings and inspections, a summary of all serious incidents and corrective action and copies of individual subcontractor's statistics reports to World Green Engineering & Contracting Co. cumulative project statistics will be provided in the form of "Lost Time Frequency Rate" and "Record of Man-hours and Accidents".

أرامكو السعودية
saudi aramco

Saudi Aramco E-Reference No. 0003463

Registration Approval Letter

January 29, 2021

Attention : WORLD GREEN FOR ENGINEERING AND CONTRACTING CO.

CR Number : 2055125706
Country : Saudi Arabia

We are pleased to inform you that WORLD GREEN FOR ENGINEERING AND CONTRACTING CO. is now registered in the Saudi Aramco Supplier Management System under Vendor Code No. 10067785, provided your company continues to meet all relevant Saudi Arabian and Saudi Aramco standards.

This registration, however, should not be construed as a commitment by Saudi Aramco to procure from you. Being registered as a supplier only grants your company the opportunity, along with other registered sources, to respond to requests for submitting proposals in accordance with Saudi Aramco's established policies and procedures. All procurement instruments including but not limited to service contracts, purchase agreements, or purchase orders will be issued based on the name and address included in your commercial registration (CR), as stated in your Supplier Registration.

Saudi Aramco wishes to remind you that being recognized as a supplier carries with it serious obligations and responsibilities to act in a legal and ethical manner. We wish to remind you of the Saudi Aramco Supplier Code of Conduct (SCOC) which you acknowledged. Failure to abide by the principles set forth in the SCOC can result in adverse actions being taken by Saudi Aramco against you including suspension of you as a supplier. Saudi Aramco also expects each of its suppliers to satisfy each of the requirements of any procurement instrument which might be placed and to act responsibly and reliably as a supply chain supplier.

Material Suppliers should apply for Saudi Aramco Supplier Portal access by forwarding a request to portal-registration@aramco.com. The Supplier Portal is the main electronic business tool used between Saudi Aramco and its suppliers and serves to improve the flow and accuracy of key supply chain information.

For further information or assistance please contact the Saudi Aramco Supplier Help Desk by forwarding a request to SupplierHelpDesk@aramco.com or via the unified call center +966 (13) 874-2222.

Moamar Khazal Al Usaimi, Supervisor
Supplier Registration Unit
Supplier Relationship Management Div

It is the responsibility of the supplier to update Saudi Aramco Supplier Registration Profile thorugh Ariba for the following:
1. Change of Name / Commercial Registration Number / Address / Owner(s)
2. Any change of the supplier location
3. Discontinue supply of approved commodities (9COMs and 9CATS)

This is an electronically generated letter by Saudi Aramco. To verify Supplier approval status, please contact Supplier Help Desk at supplierhelpdesk@aramco.com
